

PLASTERBOARDS

**mada
gypsum**
مصنع للجبس

Plasterboards are the smart modern substitute for the traditional cement/brick walls. It possesses various advantages through the ability to save space by creating thinner walls, while offering a higher rate of noise cancellation and fire resistance, it is also faster and cheaper to install. This makes Mada Plasterboards the ideal choice for your walls, ceilings, and partitions.

MGC offers a wide spectrum of Plasterboards to match any criteria and specifications needed. Only the highest quality of natural gypsum is used for our boards that are produced according to European EN520 and ASTM C1396 standards.
