SHOWER BOOTH NANOCOATING

T R I S

PRODUCT DESCRIPTION

Shower booth nanocoating is a unique product used for water diffusion and repulsion, as well as antilimescale, drop and contamination surface protection. This coating prevents limescale formation on any types of surfaces contacting with running water (e.g. shower booths, mirrors, glazed tile and etc.). The coating smoothes and freshens the glass of shower booths, washing bath and sink surfaces. It facilitates cleaning of smooth surfaces.

- preventing the formation of limescale and dirt
- maximum effect is achieved within 3 months
- consumption up to 15 m²
- Eco environmentally friendly for humans and pets.

MULTIFUNCTIONAL SPRAY GT-40

T R I S

PRODUCT DESCRIPTION

Multifunctional spray - highly effective, easily applicable means for lubrication of details and connections. Suitable for lubrication and corrosion protection of tools, door and window hinges, lock grubs, retractable antennas, fasteners, cables, chains, etc.

- Dissolves grease and bituminous stains;
- Does not have harmful effects on paints, rubber and plastic;
- Lubricates the rubbing surfaces of various movable joints, forming a resistant protective film;
- Stops and prevents the process of corrosion;
- Significantly increases the productivity of repair work;
- Can be used for winter preservation of various mechanisms and tools;
- Displaces water;
- Melts the ice.
- Eliminates creaking;
- Does not have harmful effects on paints, rubber and plastic;
- Dissolves grease and bituminous stains;
- Significantly increases the productivity of repair work;
- Melts the ice.
